Bring Caring Home

In a recent poll on www.giftsanddec.com, personal care came in second as the fastest growing gift category, at more than 28 percent. It's no wonder, then, that personal care is spreading from the medicine cabinet into every room of the home, and even outdoors, thanks to popular garden themes. Bath and body brings pampering into the bathroom and the bedroom, turning private spaces into luxury retreats; kitchen themes blur the line between personal care and gourmet; and home fragrance products waft sensual treats through the whole house without striking a match.
